

SYSTEM DESIGN / CAPSTONE PROJECT
MIS 413

Client Project Checkpoint #1
Define your project –Build a starting menu for your system

Create – One Word Document per Team:

Create a word document and format as a professional memo. One memo and one upload per team). The goal of the document is to exhibit that the team has a basic understanding of the project. Professionalism of the document will be considered in grading. Each team should get together and bring the ‘new members’ of to speed on the project as well as combine teams from MIS 411.

Sample beginning of the document:

To: Dr. Tom Janicki
From: List all team members
Date: x/x/2023
Subject: Team Project Overview

A. System Vision

The first paragraph should be your Vision Statement from your MIS 411 Class. Update your Vision Statement (if needed) to reflect additional knowledge gained about the project over the semester. Ensure the document discusses the problem, capabilities, and benefits for the client.

Next provide the following information, so that you communicate to your supervisor the design and analysis you have completed to date.

B. Deliverables – List the key deliverables in bullet format

C. Users / Actors – List the key users/ actors of your system

D. Use Cases – Detail / update at least 4 key use cases (from MIS 411).

D. Menu Items - Think ahead and what do you see as your main menu items (at this point) - Use your definitions from above to develop the menu items.

System Administrator (Dr. Cummings): (examples only – should be based on your USE Cases)

1. Ability to add/modify/delete all user data
2. Ability to add/modify/delete the key dates/time blocks

Student (add Faculty/Staff as other menu items if appropriate)

1. ...
2. ...

When complete upload one Word Document per Team to Canvas.
